

HUBERT BOJDA

DevSecOps Engineer

ABOUT ME

Cloud & DevSecOps professional with hands-on experience in Azure, Terraform, Kubernetes, and CI/CD. Strong background in infrastructure administration, cloud security, IAM, and compliance. Focused on building secure, automated and scalable environments following Security by Design principles.

EXPERIENCE

03.2026 - now

Accenture DevSecOps Engineer

- Manage **Azure** infrastructure across multiple environments using **Terraform**, including reusable development environments.
- Build and maintain Terraform-based infrastructure from the ground up for future deployments.
- Manage **AKS** clusters, Helm deployments and **Azure DevOps** pipelines supporting application delivery.
- Administer **Azure IAM/RBAC**, user access and permissions across cloud environments.
- Perform Linux system administration and day-to-day cloud infrastructure operations.
- Manage security vulnerabilities, compliance issues and data protection controls, including internal security and access audits.

01.2025 - 02.2026

TK-MED Sp z o.o. System Administrator

- Administered **VMware vSphere**, **Hyper-V** and **Proxmox** virtualization environments, maintaining availability and stability of critical services.
- Managed **Linux/Windows Server** hardening, patching and security controls to mitigate vulnerabilities.
- Provided 2nd/3rd-line infrastructure support, troubleshooting network and server incidents and performing root cause analysis.
- Working with monitoring and observability tools, such as **Prometheus** and **Grafana**, used to monitor infrastructure performance and analyze operational issues.
- Developed **Python** and **Bash** automation scripts to streamline routine administrative tasks.
- Communicated technical issues and maintenance activities to clients in a clear, business-oriented manner.

PROJECTS

JustTrip app github.com/edx-inc

Tech Stack: GCP, Github Actions, Terraform, Kubernetes, Helm

- Designed and provisioned a cost-efficient **GCP** infrastructure using **Terraform**, tailored to the project's scale and avoiding unnecessary over-engineering.
- Built CI/CD pipelines with **GitHub Actions** and GCP **Workload Identity Federation (WIF)**, eliminating the need for long-lived cloud credentials or stored secrets.
- Deployed the application on **K3s** running on a GCP VM, providing a lightweight Kubernetes environment suited to the project's early stage and cost constraints.
- Implemented **External Secrets Operator (ESO)** for secure secret management, keeping sensitive credentials out of pipelines, ConfigMaps and application repositories.
- Introduced **Helm**-based deployments and automated CI/CD workflows to improve deployment consistency and application lifecycle management.

High-Availability Password Manager github.com/xHub50N/engineering-thesis

Tech Stack: Azure, Proxmox, Terraform, Kubernetes, Helm, NetBird VPN

- Designed a **hybrid-cloud** infrastructure integrating an **on-premise** Proxmox cluster with Microsoft Azure.
- Implemented **Infrastructure as Code** with Terraform for infrastructure provisioning and management.
- Deployed a **Kubernetes** cluster with **Helm** for application hosting and management.
- Secured infrastructure access using **NetBird VPN** based on a Zero Trust approach.

Portfolio App – CI/CD & GitOps github.com/xHub50N/portfolio-app-cicd

Tech Stack: Terraform, Ansible, Jenkins, Kubernetes, HashiCorp Vault, ArgoCD

- Provisioned virtual machines using Terraform and configured them with **Ansible**.
- Implemented **GitOps** with **ArgoCD** for continuous application delivery to a K3s cluster.
- Integrated **HashiCorp Vault** for secure secrets management within the CI/CD pipeline.

CERTIFICATES

- Microsoft Azure Administrator Associate AZ-104 (in progress)
- Terraform Associate 004, Issued by HCP, June 2026
- Microsoft Azure Fundamentals AZ-900, Issued by Microsoft, March 2026
- CRC 2025, IT Administrator, Issued by ING Hubs Poland, June 2025
- CKA Certification Course – Certified Kubernetes Administrator, Issued by Kodekloud, April 2025
- Docker & Kubernetes: The Practical Guide, Issued by Udemy, July 2024

SKILLS

- Cloud & IaC: Microsoft Azure, GCP, Terraform, Ansible.
- Containers & Orchestration: Docker, Docker Compose, Kubernetes, Helm, AKS, K3S
- CI/CD: GitHub Actions, Azure DevOps, Jenkins, ArgoCD, Git
- Monitoring: Prometheus, Grafana
- Systems: Linux, Windows Server, VMware, Proxmox, Hyper-V
- Scripting: Bash, Python, PowerShell
- Security & Networking: IAM/RBAC, TCP/IP, DNS, VPN, Cybersecurity, PKI

EDUCATION

03.2026 - Now

University of Silesia

Faculty of Science and Technology

Field of study: IT

Degree: Master Engineer

10.2022 - 01.2026

Silesian University of Technology

Faculty of Applied Mathematics

Field of study: IT

Specialization: Security and programming of web applications

Degree: Engineer

SOFT SKILLS

- Clear and professional communication
- Problem-solving mindset
- Patience
- Team collaboration

LANGUAGES

- Polish (Native)
- English (C1)

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
